**Description :**

- **TORIT/DAY 156RFW10 Dust Collector with Rotary Air Lock and Non-Return Valve & Fire Prevention.**

20,300 CFM at 10:1 Air-to-cloth ratio, (156) filter bags 10' long providing a total 2030 sq. ft. of filter area; filtration media cleaning via 3 HP medium pressure air pump eliminating the need for compressed air which can be susceptible to condensation and freezing.

- Rotating cleaning air manifold driven by 0.33 HP motor, uses only (1) Nema-9 solenoid and diaphragm valve which rotates over the bag openings; galvanized steel bag frames with positive bag bolt down to eliminate leakage and ride up of bags once installed.
- Clean air side fan assembly with 24ACF CLASS I-III fan driven by a 40 HP TEFC motor. Depending on Air-to-Cloth ratio needed this fan is undersized, ie. about 12,000 CFM and can be upgraded or 2nd fan used. TORIT "16 AN" 16" rotary air lock at the bottom of 60° hopper.
