Description :

- **CEFLA - (2) Chamber, ...Vertical Oven**

CEFLA VN style 2-chamber feed through Oven with: (16) Belted trays that are 5,500 mm (217") long. Parts exiting the Sprayer will feed into the Oven in Charges and once the currently present belt is loaded, it rises up. Once at the top of the oven, cross transfers and feeds back down to the low position, which is working height to exit the Oven onto your Conveyor.

This type of Oven is excellent for a relatively small footprint, while giving you plenty of time in the oven to dry your material. The Charge size is determined by the loading conveyor in front of the Sprayer. The approx. footprint is 20' wide x 25' long. Considering the belted trays are 18' long x (16) trays; it is the equivalent of 288' of conveyor inside this small footprint.

NOTE: Boiler NOT included.
Price is FOB Italy; freight and import duties not included.

The actual machine is shown in the pictures: It has seen very little use in its life and has been sitting most of the time. Equipment will be completely gone through and refurbished to "like new" condition.
