Description :

- **KREG DK 3100 Pocket Hole Boring Machine**
Electric 3-spindle Pocket Drill; 1.5 HP direct drive electric motor; 39-1/2" table/ top working height; (0.5 - 1) Sec cycle time.
- Drills (2) pocket holes in (1) machining cycle across rails of varying widths with 3/8" dia. step bit in (1) smooth operation.... Drill spindles in the machine are fixed at 3/4" - 1" and 1-3/4" on center allowing it to handle most common rail widths of 1-1/2" up to 3-3/4" with ease.
- One of the (3) Spindles is with left-handed, simply remove one bit from the spindle not being used to set the desired 2-hole spacing.
- The bits are supported all the way to the workpiece by a hardened steel drill guide that ensures tear-out free holes and consistent placement in virtually any material.
- Features: 15° Boring angle for greater stability, reduced screw breakout & splitting. This produces a smaller "flat-bottom" pocket hole with rounded sides that can be plugged with a dowel if desired.
