Description :

- **EXTREMA DC-4100 Baghouse Dust Collector**

The "DC-4100" baghouse dust collector is designed to achieve maximum airflow with a superior filtration area. This is achieved by using (36) smaller diameter filter bags to have more filter media in the same space as other similar dust collectors of its size. More filter area means better airflow with less filter maintenance. A manual bag shaker is included.

The DC-4100 meets the NFPA664 CFM requirements for indoor dust collectors. The compact design allows this maximum filtration unit to use a depth of less than three and one half along a wall. The 10HP main motor has a dynamic balanced impellor and a magnetic starter is included.

Specifications:

- With a 10 HP motor and a 5,000 CFM @ 7" WG and 361 Sq/ft of filter media.
- 10 HP - 1,750 RPM TEFC Motor, (36) Beane material filter bags and magnetic starter.
- Features: Easy installation, typically (1) hour; quiet operation, (3) waste discharge points. Inlet opening 12".
