**Description :**

- **CAM-WOOD ST-3VFD Variable Speed 3-Roller Feeder**
- With the powerful feeding strength, one can freely & simply assemble, dismantle & adjust it. It may be installed onto the circular saw, shaper, sander, router, planer serving as one's invisible third hand at work.
- There are three (3) feed rollers on this feeder. Each roller has a suspender to hold simultaneously the workpiece at different degrees of thickness. It is also used to help the feed pressure. In case you need a large space between the rollers, you can take off the middle roller so the remaining rollers may be used for curve driving. Feeding Speed: 10 - 79 FPM (VAR).
- For spindle molder, the feeder may be adjusted to the leveling direction for side feed to meet the requirement of various processing condition.
- There are two (2) sets of matching & interchangeable gears of variable sizes to create for stages of feeding speed.

**Sales - Liquidations - Auctions - Appraisals - Consulting**

**Machinery for the Woodworking, Stone,  
Glass, Plastic, and Metalworking Industries**

---

- Forward & reverse feeding switch.
- Universal support stand with cast iron base, main bracket, thick refaced column and aluminum hand wheels for vertical and horizontal positioning.
