- Motorized saw arbor and thickness adjustment for operator convenience.
- Specially designed auxiliary powered outfeed roller assures maximum smoothness of workpiece outfeed especially when working on extra thick, heavy and moist wood.
- A digitally controller lubrication unit is provided to provide consistent oil protection to the feed chain and guide rails. If the oil level drops below a safe level a warning lamp will light up and the feed chain will stop automatically.
- Equipped with an electronic amperage display which is tied in to an overload protection where if the saw motor exceeds a rated amperage the feed chain slows down automatically. This prevents the potential damaged to the saw arbor and/or blades and also prolongs blade life up to 20%.
- Variable feed speed adjustment by frequency inverter from the front of the machine.
- Please note. with safety cover non-CE
- Measurement: 255x210x170(cm)  
N.W./G.W.:3,150KGS/3,350KGS
